

Daylight 6.5 Terminal Server System
Requirements

September 3, 2008

Daylight Terminal Server Requirements

Properties	Category	Server Requirements
Up to 10 users	Processor: Memory: Disk I/O Subsystem:	PIII/800MHz (P4/1.4 GHz recommended) 2GB RAM Two 18GB SCSI disks (RAID 1) RAID Controller
Up to 20 users	Processor: Memory: Disk I/O Subsystem:	P4/1.4GHz (Dual Core P4/1.4 GHz recommended) 3GB RAM Two 18GB SCSI disks (RAID 1) RAID Controller
Up to 40 users	Processor: Memory: Disk I/O Subsystem:	(2) P4/1.4GHz 4GB RAM Two 18GB SCSI disks (RAID 1) RAID Controller
40+ users		Multiple Load Balanced Terminal Servers Required.
Category		Additional Terminal Server Requirements
	Operating System: Network Protocol: NIC Speed: Citrix: Internet Explorer: Microsoft Office: Other Software: Miscellaneous: Printers: Regional Settings/Foreign OS: Remote Access:	Windows 2000 Server w/Terminal Services or Windows Server 2003 w/ Terminal Services TCP/IP Switched 100 Mbps or better between Terminal and Database server Citrix Metaframe Presentation Server ¹ 6.0 SP1 Microsoft® Word/Excel 2000, XP, or 2003, 2007 Adobe® Acrobat Reader (Required to view BEOs and reports) Antivirus, UPS, site responsible for acquiring all necessary licenses Must be Terminal Server compatible US-English, UK-English, French, German, Spanish Please see Newmarket International's Remote Access Statement .

Terminal Server Workstation Requirements

Category	Remote Workstation Requirements
Processor:	Intel Pentium
Hardware Requirements:	Citrix Metaframe ICA Client ² for all supported Operating Systems, Microsoft Terminal Server Client Access License, Citrix MetaFrame Client Access License Note: Recommend compatible Office version running on workstation if local editing of documents and spreadsheets is necessary.
Network Protocol:	TCP/IP
Memory:	16MB RAM
Video Resolution:	SVGA 800X600 resolution, 1024x768 recommended
Network Bandwidth:	20Kbps or better per active user session and <200ms network latency if using Citrix 28Kbps or better per active user session and <200ms network latency if using RDP ³
Miscellaneous:	AntiVirus, site responsible for acquiring all necessary licenses
Optional:	16-bit sound card, microphone, and speakers/headset
Remote Access:	Please see Newmarket International's Remote Access Statement .

Notes to customers on System Requirements

- System Requirements are minimum guidelines. Actual requirements will vary based on your system configuration, installed applications, and usage.
- If system requirements are not met, the customer assumes responsibility of performance and compatibility issues as a result thereof.
- As the customer grows their business and data over time, it is possible that system upgrades would need to occur (for example, memory and disk subsystem).
- Customer assumes responsibility for ongoing maintenance, virus protection, data backup, and security of their system.

Endnotes

¹ If more than one server is used, Citrix MetaFrame Presentation Server requires the Advanced or Enterprise edition (Previously named XPa or XPe).

² Microsoft's RDP Client is an option for connecting a small number of remote users. Contact your Sales Representative for details and operational limitations.

³ 28K is based on v5.0 of the RDP client with 2000 Server. Server 2003 with later versions of the RDP client is reported to be more efficient.
